

One Click Cleaner

A break through fiber cleaning concept 3C3®One Click Cleaner is a one action cleaning solution for fiber optic connectors/adaptors. By a single push it can effectively remove a variety of contaminants. One click unit can easily accomplish >500 cleanings. 3C3® Cleaner is truly a complete solution for fiber optic cleaning. Available in both 2.5mm and 1.25mm type.

MPO/MTP Connector cleaner employs micro fibers designed specially for optical connectors to remove even the smallest contamination not visible to the naked eye.

Features

- Removes dust and oil adhering to the ferrule endface of fiber optic connector with one push mechanical action.
- Cleans the ferrule endface inside an adapter or connectors on jumpers by making full use of guide cap.
- Refrains from transmission error or endface damage by dirty cleaning.
- Complies with EU/95/2002/EC directive (RoHS).

Applications

- Cleans the ferrule endface inside an adapter or connectors on jumpers and builds reliable networks for Datacom, FTTH, etc. with faster installation of patchcords, pigtails and field assembly connectors.
