

Fiber JacketStripper

The new three-hole model performs all common fiber stripping functions in one compact tool. There's one hole for stripping 250um coatings on standard 125um fiber, one hole for stripping 900um tight buffer to 250um buffer coatings, and one hole for stripping 2-3mm jacketing.

Features

- Wire Looping / bending holes conveniently located
- Automatic return spring for ease of use of speed
- Compact and lightweight with narrow nose design
- Black Oxide finish for extra corrosion protection
- Length: 6.25 inches (159mm)
