

RJ45/RJ11 Professional Crimping Tool

RJ45/RJ11 Crimp Tool from 3C3® installs Cat5e/Cat6/Cat6A modular Plug and is specifically designed for RJ45 & RJ11 connector types. This ratcheting, high-leverage RJ45 crimp tool is ultra-stable for repeatable terminations and is perfect for high-performance, larger OD cables that are tougher to terminate due to larger wire gauges, thicker, harder insulation and pair-separating splines. Be assured that every termination will meet FCC specifications.

Features

- Panel Crimping action and professional type.
- Provides precision operation with key way in 8P modular holder.
- Modular holders are made of AL-ZN, light weight and durable.
- Cut and Strips wire in one operations, easy and efficient to use.
- Built-in round cable stripper.
