

RJ45 RJ11 Crimping Tool with Cable Tester

RJ45/ RJ11 Crimping Tool with Cable Tester is specifically designed for RJ45 & RJ11 connector terminations with Cat5e, Cat6 & Cat6A cables. This also have facility for testing the cables for continuity/ polarity. This ratcheting, high-leverage crimp tool is ultra-stable for repeated terminations. This tool is ideal to provide high-performance. Larger OD cables that are tougher to terminate due to larger wire gauges, thicker, harder insulation and pair-separating splines also can be terminated using this tool.

Features

- Used for Termination of Unshielded and Shielded twisted pair cables
- Provided with test Jack compatible for UTP & STP connector
- In-built wiring indicators providing Short, Miss wire, Reversal, Split Pair status
- Indication provided for Pair and Shield continuity
- Can be used as a Debugging tool for any continuity issues
- Removable Probe for testing far point of a lengthy cable
- Locking feature provided to keep the tool in compact form

Technical Specifications

Cables Supported	: Single Pair, Two Pair, Four Pair (Shielded/Unshielded)
Size (Length)	: 220mm
Weight	: 525 Grams
Batteries	: 6 volt A544 1/2AA size battery or 4LR44 Button cell batteries
Maximum Testing Length tested	: 90m
Installation Temperature	: -10°C ~ +60°C
