

Fiber Cleaver

The High Precision cleavers are designed for cleaving fiber quickly and easily. These cleavers are extremely rugged, durable and its lightweight and compact size makes them the perfect addition to any splicing system.

Features

- Tool free blade rotation Mechanism
- Easy operation
- Compact Size and light weight

Technical Specifications

Cladding Diameter	: 125nm
Applicable Fiber	: SM, MM, DS, NZDS, G655, G657 and others
Applicable Coating	: 0.25mm – 0.9mm
Cleave length	: 10 ~16mm
Cutting angle adaption Value	: $\leq 0.7^{\circ}$
Edge Life	: 6000 Times
Dimension	: 100W x 70D x 50 (mm)
Weight	: 300 grams
